DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on November 18th, 2003 have been fully considered but they are not persuasive. The applicant argues that Yee '258 does not teach, suggest, or imply that a spacecraft radiator system of the instant invention wherein one or more coupling heat pipes are cross coupled to opposite facing payload and deployable radiators. The examiner disagrees. Yee '258 does suggest a spacecraft radiator system of the instant invention wherein one or more coupling heat pipes are cross-coupled to opposite facing payload and deployable radiators (see column 2 lines 15 through 35). Yee states that "one loop heat pipe 11 may e coupled to north, south, east, west, earth, and anti-earth facing radiator panels 13 **or any combination thereof**".

In conclusion the rejection of claims 1 through 5 made in the previous office action dated September 9th, 2003 is thereby repeated and made final

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3743

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
